

Prevent Your Cash Register Rolls from Getting to the Wrong Hands

With EAS Receipt Rolls Certified by Sensormatic®

The EAS (Electronic Article Surveillance) tag is permanently inserted into the core so it can't be removed.

Combine your EAS Receipt Rolls with Scratch & Secure or MultiColor inks for an unbeatable combination.

Combine Scratch & Secure™ inks with an EAS-tagged paper roll core for maximum security.

FACT: Printed POS rolls can be worth over \$10,000 to receipt fraud crooks who have been known to offer up to \$1,000 for authentic rolls.

To complement Scratch & Secure or Multi-Color inks, Nashua offers retailers another unique security feature – a patented core-insert with EAS. It provides retailers maximum protection against costly theft of receipt rolls.

- The system consists of a core insert that contains a Sensormatic Ultramax EAS (electronic article surveillance) tag.
- The Sensormatic tag activates an alarm at exit doors equipped with Sensormatic EAS pedestals.
- These pedestals produce an acousto-magnetic pulse that is interrupted by a 'live' tag, causing the EAS system to sound an alarm.

Protect your receipt rolls with an unbeatable combination of security features from Nashua.
